

In regards to replacing Air 1 radio stations with Low Power FM stations: It would be a tragedy to take Air 1 off the air. Air 1 plays a unique musical genre that appeals to the younger generation and offers them a safe alternative to the secular radio stations of similar style that often feature coarse DJs and lyrics that are demeaning or immoral. In my community, there is no other radio station that is similar to Air 1. There are constant stories on Air 1 about how listeners are encouraged by listening, how listening helps them become better people, and how the positive messages on Air 1 carry them through the day. If we lose Air 1, we lose those benefits to our individual lives and our community. Air 1 is a unique and very beneficial part of our community. Please do not replace it with a LPFM station. Thank you.
